PROJECTS

🔗 JOB SEEKING APPLICATION

- Developed a full-featured job seeking platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented user authentication, job listing management, see all job available, Delete Application, and an intuitive admin dashboard for create and update management.
- Utilized Redux for state management and deployed the application on a cloud platform (Vercel/Render).
- Live Demo: <https://job-seeking-appliaction-woad.vercel.app/login/>

🔗 FOOD DELIVERY Platform

- Developed an interactive web application to facilitate food ordering and delivery through a seamless user experience.
- Built a responsive and user-friendly UI with React.js, JavaScript and Tailwind CSS.
- Deployed the platform on Vercel for seamless accessibility.
- Live Demo: <https://food-delivery-web-apps.vercel.app/>

🔗 PORTFOLIO

- Developed a portfolio using [Tech Stack: Html, Css, Javascript].
- Deployed the website using [Github] for real-world accessibility.
- Live Demo: <https://ashis2002.github.io/Portfolio/>
